

Setting The Industry Standard For Innovative And Effective Commercial Security Systems

Introducing Omni Data. Our expertise enables us to create innovative options that address the specific challenges you face. Omni Data will work with you as a trusted advisor to help formulate a solution that addresses your current needs and provide a roadmap to future proof your investment.

We work with industry-leading security and networking manufacturers, and keep every aspect of the design and installation process in-house. In situations where suitable solutions may not already exist, our team of experienced engineers are able to create options that address the specific challenges you face.

IP-based systems, HD camera, advanced networking, WLAN services, multi-stage access control systems, and a myriad of smart technologies are integrated together with existing systems and infrastructure to create a sophisticated web of safety and security.

OUR SERVICES

ENGINEERING

Solving problems with innovative thinking.

DESIGN

Driving results with superior systems.

INSTALLATION

Improving performance through flawless execution.

MAINTENANCE

Maximizing uptime with proactive support.

Saving Lives & Property With The Only Systems That Can Pass Critical Data Directly to First Responders in an Emergency

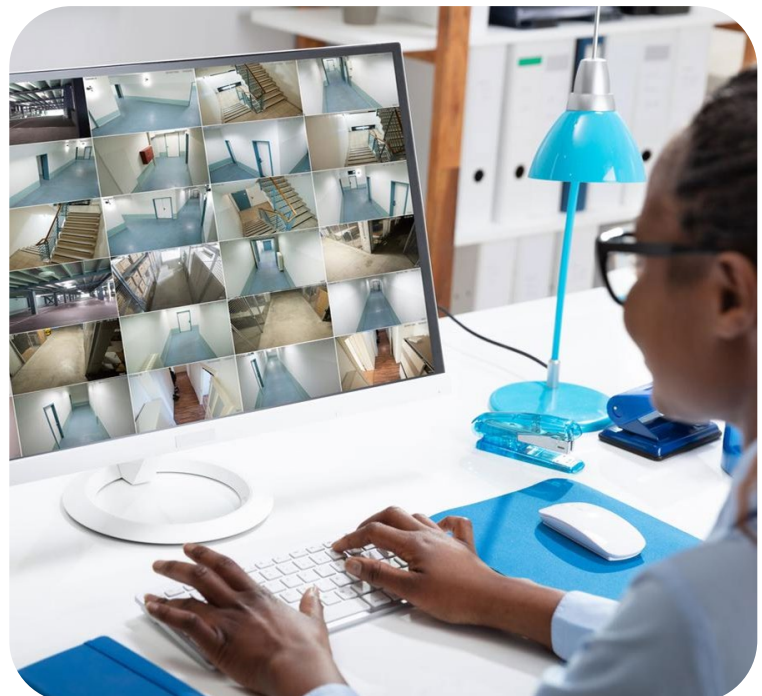

Omni Data is the only certified RapidSOS Ready commercial security company in the Northeast. Security systems from Omni Data connect to the RapidSOS platform and send critical alarm data directly to 911 and first responders during an emergency.

80+% of 911 dispatchers recommend using a RapidSOS Ready security system.

In an emergency, the RapidSOS platform sends alarm panel information straight to the 911 dispatcher's screen, improving dispatch times and saving lives and property.

"Our 911 dispatchers have access to time sensitive information that can immediately show key information about the incident, and provide critical details so that the first responders can respond faster and more efficiently."

Captain Scott Brillman, Dir. of 911, City of Baltimore

SAFE. SECURE. SMART.

Leading-Edge Solutions Customized To Align With Your Specific Needs

The very nature of security is that your needs will change over time. To keep your organization secure, you need a provider you can trust to anticipate threats as they emerge – one you can rely upon to deliver leading-edge solutions that take your systems to the next level.

FIRE DETECTION

For more effective monitoring and faster response.

ACCESS CONTROL

Including cloud-based physical and virtual access.

ADVANCED SURVEILLANCE

End-to-end solutions, device monitoring and management.

INTRUSION DETECTION

Using the latest technology to protect people and property.

ENTERPRISE NETWORKING

Providing secure, scalable and reliable network infrastructure.

MANAGED SYSTEMS

24/7 remote NOC monitoring to make sure your critical systems are always online.

Expertise In Safety And Security Is Only Half The Equation

The other half: Understanding the complexities of your industry and being able to engineer solutions that work in your world.

- Property Management and Multi-Family Residential
- Transportation and Airports
- Manufacturing and Industrial
- Hospitality

- Healthcare and Senior Living
- Government
- Commercial Buildings
- Call and Data Centers

RapidSOS Ready

In partnership with public safety, RapidSOS has created the world's first emergency response data platform that securely links life-saving data from connected devices to 911 in an emergency.

RapidSOS supports over 4,800 Emergency Communications Centers that protect 90%+ of the US population and enables faster, smarter response for over 250 million emergencies annually.
