

Saving Lives & Property With The Only Systems That Can Pass Critical Data Directly to 911 & First Responders in an Emergency

From fire detection to access control, you can rely on Omni Data to deliver leading-edge solutions that are ideally suited for the challenges you face. Omni Data is the only certified RapidSOS Ready commercial security company in the Northeast.

Security and fire alarm systems from Omni Data connect to the RapidSOS platform and send critical alarm data directly to 911 and first responders during an emergency.

How it Works

In an emergency, the RapidSOS platform can send alarm location and zone information straight to the 911 dispatcher's screen, improving dispatch times and saving lives and property.

80+% of 911 dispatchers recommend using a RapidSOS Ready security system.

Connect via the prioritized 911 line

Reduce response times

Share building controls and floor plans directly with responders

Who is RapidSOS?

In partnership with public safety, RapidSOS has created the world's first emergency response data platform that securely links life-saving data from connected devices to 911 in an emergency.

300 Million

Covering 300 million people

RapidSOS protects over 92% of people in the US, and reaches more every day.

4,800 Centers

Used in over 4,800 public safety agencies

RapidSOS is the trusted data provider for first responders worldwide.

250 Million

Managing 250 million+ emergencies annually

The RapidSOS platform supports first responders with critical life-saving data.

"[With RapidSOS] our 911 dispatchers have access to time sensitive information that can immediately show key information about the incident, and provide critical details so that the first responders can respond faster and more efficiently."

Captain Scott Brillman, Dir. of 911, City of Baltimore
